INFORMATION AND MANAGEMENT SUPPORT STAFF
WEEKLY REPORT FOR PERIOD ENDING 5 MARCH 1986

1. Progress Report on Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred During the Preceding Week:

A. DAS

25X1 (1) FEDPARK (Federal Paid Parking System). [redacted]
25X1 [redacted] TG/DAS, has completed work on the modifications to the
25X1 FEDPARK database. OL/HOME Parking Allocation Branch (PAB)
personnel met with [redacted] to test and review the newly
modified procedure and menu. PAB personnel approved the new
modifications and have started entering the 1986 parking permit
data.

25X1 (2) SECOND (Security Contractor Data System). [redacted]
TG/DAS, gave a revised menu for the BIO file to OL/SS. This
will allow the operator to delete data while in the menu and
should save considerable time and effort.

25X1 (3) [redacted] reviewed a PC system with [redacted] of
the Mail and Courier Branch. The Agency purchased this system
to keep track of courier receipts from an independent contractor
and is having problems with the time required to update the data
base. To get around this problem, they are not using the system
to its full capacity. Ed will research the problem to see if it
can be fixed in-house, or if it will have to be turned back to
the vendor.

25X1 (4) [redacted] has been working on a survey of terminals
25X1 [redacted] Currently many of these terminals are on
a single COMTEN, resulting in severe problems when that COMTEN
goes down. We hope to alleviate the problem by spreading the
terminals over several COMTENS. [redacted]

25X1
